

**NQS and
the Disability
Discrimination
Act**

Quality Area 3 Physical environment

The NQS supports children with disability.

Well-designed, inclusive environments support access and participation for every child and promote children's wellbeing, creativity and developing independence.

How does our environment support the access and participation of all children and families, including those with disability?

How do we continue to identify possible barriers to participation and address these through making reasonable adjustments?

How do we ensure our environment is inclusive and promotes play-based learning, including the provision of quiet spaces and sensory resources?

This project was funded by the Australian Government.
